Centero Carillon is tool for local permission management in Microsoft Windows environment. It is used to manage local group memberships and local user accounts.

Centero Carillon consists of following components:

- Centero Carillon Portal (web application build on Microsoft Internet Information Server with ASP.NET)
- Centero Carillon Database (database build on Microsoft SQL server)
- Agent Gateway (web services build on Microsoft Internet Information Server with ASP.NET)
- Centero Agent (.Net Framework client application platform for Centero applications)
- Carillon Client (.Net Framework extension to Centero Agent)
