

SMTP Settings

Last Modified on 17/04/2020 11:54 am EEST

SMTP settings page is used to specify SMTP email settings so that Agent Gateway can send emails. For Centro Carillon SMTP settings are not mandatory. If existing Agent Gateway is being updated you can find out the existing database server settings from Agent Gateway website web.config file.

The screenshot shows a dialog box titled "Centro Agent Gateway 1.5.5047.40 (64-bit) - InstallShield Wizard". The dialog has a close button (X) in the top right corner. Below the title bar, there is an orange circular icon with a white sunburst and the text "SMTP Settings" and "Specify SMTP settings". The main area of the dialog contains three input fields: "SMTP Server:" with the value "smtp.yourdomain.net", "Port:" with the value "25", and "From address:" with the value "centerogateway@yourdomain.net". At the bottom of the dialog, there are three buttons: "< Back", "Next >" (which is highlighted with a blue dashed border), and "Cancel". The "InstallShield" logo is visible in the bottom left corner of the dialog.

1. SMTP Server

Specify the server name or IP address where SMTP service is running.

2. Port

Specify port number where SMTP service is listening connections.

3. From address

Specify email address that will be used as sender when Agent Gateway sends emails.

4. Back

Click to go to previous page on installation wizard.

5. Next

Click to go to next page on installation wizard.

6. Cancel

Click to cancel installation.
