

Features

Last Modified on 17/04/2020 1:18 pm EEST

Carillon Client custom setup page is used to select features that will be installed as well as the destination where Carillon Client module is installed.

1. Features

Select features to be installed. Carillon module feature is required for Centero Carillon to work. Credential provider can be installed on Windows Vista and later operating systems (requires Microsoft Visual C++ Redistributables to be installed on computer).

2. Destination folder

Click to change destination folder for Carillon module. Do not change folder if alternative Carillon Client module location has not been specified to computers using Active Directory Group Policy.

3. Help

Click to show help on selecting feature install states.

4. Space

Click to show available space on local disks.

5. Back

Click to go to previous page on installation wizard.

6. Next

Click to go to next page on installation wizard.

7. Cancel

Click to cancel installation
