

Licenses

Last Modified on 25/02/2021 12:30 pm EET

License page allows license file management for Centro Carillon. Server license needs to be loaded first to Centro Carillon and then client access license file(s) can be loaded.

The screenshot shows the 'Licenses' page in the Centro Carillon interface. On the left sidebar, there is a 'Licenses' section with a 'Carillon server license' (1) and a 'Load server license' (2) button. The main content area is titled 'Client Access Licenses' and shows a table with one row of data. The table columns are License ID, Upgrade ID, Version, Amount, Expires (UTC), and Support expires (UTC). The Amount column contains the value 200 (4). The License ID column contains the value 637492510130988342 (6). The page also shows navigation controls like 'Page: 1 of 1' and 'Page size: 1'.

1. Server license information

Information about currently loaded server license. If server license information needs to be changed a new license file must be created and loaded to Centro Carillon.

2. Load server license

Load new server license file to Centro Carillon. More detailed information in '[Load license](#)' chapter.

3. Load client access license

Load new client access license file to Centro Carillon. More detailed information in '[Load license](#)' chapter.

4. Client access license information

Following information is shown for each loaded client access license in client access licenses grid:

- License ID (unique ID for license)
- Upgrade ID (unique ID of upgraded license file)
- Version
- Amount of clients this client access license entry can support
- Expires (date in UTC when license expires, if empty the license does not expire)
- Support expires (date in UTC when support for license expires, if empty the support for license does not expire)

5. Delete multiple client access licenses

Delete selected (select one or more client access licenses to activate this action) client access licenses from Centro Carillon.

6. Delete single client access license

Delete client access license from Centro Carillon.

Note!

Before deleting client access licenses make sure that enough required version licenses remains in Centro Carillon. There is no need to remove old or expired client access licenses but these can be removed from Centro Carillon if administrators want to keep only valid client access licenses.
