

Change database

Last Modified on 25/02/2021 12:32 pm EET

If Carillon environment is configured to connect to several Carillon databases, this page allows you to connect Centro Carillon portal to selected database. Available databases can be configured in web.config file. See more information in '[web.config](#)' chapter.

1. Select database
Select desired database.
2. Connect
Connect Centro Carillon portal to selected database.
